github.com/Eng-Wajahat
Old Satellite Town., Sargodha

SKILLS

Django
Python
Statistics
Flask
Numpy || Pandas

EDUCATION

Software Engineering
University of Management and Technology
2015-2019

My graduation was in Software Engineering and my Final year Project was a business implementation in collaboration with the Arts Council of Gilgit-Baltistan of an E-Commerce Web application.

ADDITIONALS

Blender 3D Modelling
Google Digital Marketing Certified
Amazon Retail Adverts Certified
Davinci Resolve Expert
Adobe Photoshop Expert

PROFILE

Success is Subjective, before anything I am a Disciplined Muslim. And I aim to follow our Moral values as strictly as possible. Machine Learning was the reason I chose to work on Python web frameworks instead of continuing php, because of the increased use of data models today.

PROJECTS

github.com/Eng-Wajahat

Django Portfolio

AWS Lambda || zeet || Github

k6tkucmczb.execute-api.us-west-2.amazonaws.com/

- The portfolio website contains a detailed projects list with their GitHub links,
- Those projects include my practice exercises and past jobs with attached source code and files on GitHub.
- This projects also helped me learn the basics of Web App Deployment on Amazon AWS Services.

Freelance Jobs

Local businesses, Online

- I transformed a static 2D logo into a dynamic visual by animating its elements, providing motion and creativity.
- I created engaging advertisements and offered comprehensive YouTube ad services to a small YouTube channel, enhancing online presence and audience reach.

Software Penetration Tester

HackerOne, Bugcrowd

- Assessed threats, risks, and vulnerabilities from emerging security issues to advise pertinent stakeholders on appropriate measures.
- Recommended IT security improvements to achieve system confidentiality, integrity, and availability.
- Documented the entire penetration testing lifecycle during engagements for future review.
